Lieberman named 2017 Whole Child Award recipient

December 21, 2016 - 2:59pm

Alicia Lieberman, PhD [1]

Irving B. Harris Endowed Chair of Infant Mental Health, Professor and Department of Psychiatry Vice Chair for Faculty Development Alicia F. Lieberman, PhD [1], has been selected by the Simms/Mann Institute [2] as one of its three 2017 recipients of the Whole Child Award. The honor recognizes extraordinary leaders in the field of care for children ages 0-3 who incorporate new and integrative approaches in education and health.

Lieberman was singled out for recognition for her contributions in the realm of education and advocacy. She will be presented with her award during the Simms/Mann Institute Institute Think Tank [3] on February 9 in Santa Monica, Calif.

Lieberman is the director of the Child Trauma Research Project [4] at Zuckerberg San Francisco General Hospital and Trauma Center, as well as the Early Trauma Treatment Network [5], a center of the National Child Traumatic Stress Network. She is a past president of Zero to Three: The National Center for Infants, Toddlers and Families [6], and the author or senior author of several books for parents and clinicians, including The Emotional Life of the Toddler (1993), Losing a Parent to Death in the Early Years: Treating Traumatic Bereavement in Infancy and Early Childhood (2003); Don’t Hit My Mommy: A Manual for Child-Parent Psychotherapy with Young Witnesses of Domestic Violence (2005), and Psychotherapy with Infants and Young Children: Repairing the Effect of Stress and Trauma on Early Attachment (2008), as well as an editor of Zero to Three’s 1994 Diagnostic Classification of Mental Health and Developmental Disorders of Infancy and Early Childhood (DC:0-3) and 2005’s Diagnostic Classification of Mental Health and Developmental Disorders of Infancy and Early Childhood, Revised Edition (DC:0-3R).
She served on the National Research Council and Institute of Medicine Committee on Integrating the Science of Early Childhood Development, whose work resulted in the publication of the influential *From Neurons to Neighborhoods: The Science of Early Childhood* (2000), and is the author of over 50 articles and chapters about infancy and therapeutic interventions in the early years. She lectures extensively in four continents and is a consultant to government agencies and private foundations nationally and abroad.

**About the Simms/Mann Institute**

The Simms/Mann Institute develops and implements innovative programs and resources to address the complex challenges of the 21st century. The Institute seeks to empower professionals and individuals alike to make informed decisions and personalized choices by promoting the exploration, cross-fertilization, and dissemination of cutting-edge research and best practices in the fields of education and medicine.

**About UCSF Psychiatry**

The UCSF Department of Psychiatry and the Langley Porter Psychiatric Institute are among the nation's foremost resources in the fields of child, adolescent, adult and geriatric mental health. Together they constitute one of the largest departments in the UCSF School of Medicine and the UCSF Weill Institute for Neurosciences, with a mission focused on research (basic, translational, clinical), teaching, patient care and public service.

UCSF Psychiatry conducts its clinical, educational and research efforts at a variety of locations in Northern California, including UCSF campuses at Parnassus Heights, Mission Bay and Laurel Heights, the UCSF Medical Center at Mt. Zion, Zuckerberg San Francisco General Hospital and Trauma Center, the San Francisco VA Health Care System and UCSF Fresno.

**About the UCSF Weill Institute for Neurosciences**

The UCSF Weill Institute for Neurosciences, established by the extraordinary generosity of Joan and Sanford I. "Sandy" Weill, brings together world-class researchers with top-ranked physicians to solve some of the most complex challenges in the human brain.

The UCSF Weill Institute leverages UCSF's unrivaled bench-to-bedside excellence in the neurosciences. It unites three UCSF departments - Neurology, Psychiatry and Neurological Surgery - that are highly esteemed for both patient care and research, as well as the Neuroscience Graduate Program, a cross-disciplinary alliance of nearly 100 UCSF faculty members from 15 basic-science departments, as well as the UCSF Institute for Neurodegenerative Diseases, a multidisciplinary research center focused on finding effective treatments for Alzheimer's disease, frontotemporal dementia, Parkinson's disease and other neurodegenerative disorders.

**About UCSF**

UC San Francisco (UCSF) is a leading university dedicated to promoting health worldwide through advanced biomedical research, graduate-level education in the life sciences and health professions, and excellence in patient care. It includes top-ranked graduate schools of dentistry, medicine, nursing and pharmacy; a graduate division with nationally renowned
programs in basic, biomedical, translational and population sciences; and a preeminent biomedical research enterprise. It also includes UCSF Health, which comprises two top-ranked hospitals, UCSF Medical Center and UCSF Benioff Children’s Hospital San Francisco, and other partner and affiliated hospitals and healthcare providers throughout the Bay Area.
