HALP Research

Research within the Hyperactivity and Learning Problems Program is focused on developing and testing clinic and school-based treatments for children with ADHD and related problems.

Collaborative Life Skills Program (CLS) [1]

The Collaborative Life Skills Program was developed in partnership with San Francisco Unified School District to address the gap in evidence-based school services for students with attention and behavior problems.

Collaborative Life Skills Remote Project (CLS-R) [2]

In partnership with San Francisco Unified School District, we are currently developing a remote, web-based professional development program for school mental health providers based on CLS.

Child Life and Attention Skills Program (CLAS) [3]

The Child Life and Attention Skills Program is a behavioral treatment for children with the inattentive presentation of ADHD (ADHD-I) that includes parents, teachers, and children in the intervention.?
